PARETURN CERVINO WORLD INVESTMENTS P-B (EUR)

ISIN: LU0907323314

This Fund is managed by MDO Management Company S.A.

Objectives and Investment Policy

The objective of the Sub-Fund **PARETURN CERVINO WORLD INVESTMENTS** is to provide investors with long-term capital appreciation through realized gains, as well as income. In order to achieve the investment objective, the Sub-Fund will invest principally in global equities.

Investment performance of the Sub-Fund will be measured against a benchmark, which shall be the MSCI World Net index in Euros.

The proportion of the Sub-Fund invested in global equities may vary widely, depending on the market risk exposure from time to time. In order to manage such market risk, the proportion invested in global equities might be reduced in favor of investments in deposits, money market instruments, transferable securities producing a fixed income, or other collective investment undertakings (including UCITS).

The Sub-Fund will invest in transferable securities listed or traded in recognized markets of member states of the OECD. The Sub-Fund will primarily invest in mid to large capitalization companies at the time of investment, that the Investment Manager considers are going to pay growing and sustainable dividends and whose real value is substantially superior to the existing market valuation, according to the Investment Manager's criteria. The Sub-Fund will normally invest in the transferable securities of between 40 and 70 companies.

The Sub-Fund may deal in foreign exchange transactions for hedging as well as non-hedging purposes.

The Sub-Fund may enter into derivatives (including OTC derivatives) for hedging and investment purposes, in compliance with current legislation for UCITS.

The Sub-Fund will not exceed the general limits for the use of financial derivative instruments for reasons of market and counterparty risk set out in current legislation for UCITS.

Reference currency of the Sub-Fund: EUR.

Reference currency of the present share class: EUR.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw their money before 3 years.

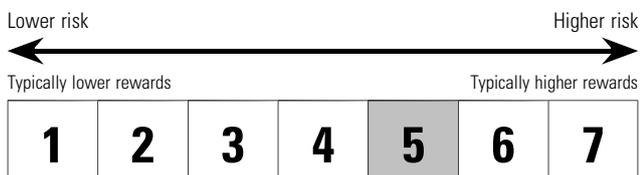

Income arising from the Sub-Fund will be reinvested.

The Net Asset Value "NAV" of the Sub-Fund will be determined weekly, namely each Monday. If this is a public holiday in Luxembourg, the NAV will be dated the following bank working day.

Cut off/settlements: Subscription/Conversion lists are closed at 16.00 pm at the latest one day before each Valuation Day.

The payment of redemption, subscriptions and conversions shall be made in the reference currency of the Sub-Fund, category or class of shares within three (3) business days following the Valuation Day.

Risk and Reward Profile

The Sub-Fund may principally invest its assets in UCITS which invest in equities and bonds. The Sub-Fund's exposure to equities means that investors are exposed to stock market movements and therefore they should expect the value of the Sub-Fund to rise and fall on a daily basis. Bond prices can fluctuate significantly depending on not only the global economic and interest rate conditions, but also the general credit market environment and the creditworthiness of the issuer.

This risk indicator is calculated using historical data, which cannot be used as a prediction for the future risk profile of the Sub-Fund. Therefore, the risk and reward category shown is not guaranteed to remain unchanged and the categorisation of the Sub-Fund may shift over time. Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

At this time, the level of the risk and reward profile is estimated to be a SRRI category of 5, due to the present profile of the underlying funds.

The Risk and Reward Profile does not take into consideration the following risks, which can affect the Fund:

- **the credit risk** (which are linked to the debt securities the Sub-Fund invest in);
- **the operational risk** (which may occur due to technical issues for example natural disasters, misunderstandings and fraud);
- **the counterparty risk** (which may occur due to the fact that the Fund might have exposure through contract with third parties);
- **the liquidity risk** (which may occur due to the fact that the level of investments is made in financial instruments that could have a low level of liquidity in some extraordinary circumstances for example in the case of market crash and default of debt claims on issuers side).
